

1. Write a test scenario for a given functionality.

The following test scenarios can be identified for the function of organization overheads:

Test Scenario ID	Test Scenario
OO_1	Check the Overheads page on the Organization tab
OO_2	Check the creation of new organization overheads categories
OO_3	Check the editing of details of existing organization overheads categories
OO_4	Check the removal of existing organization overheads categories
OO_5	Check the reflection of organization overheads in the organization finance report in three stages (scheduled, not settled, settled).
OO_6	Check if organization overheads are included in the project finance report
OO_7	Check if the user with the Organization Access has access to the Overheads page
OO_8	Check the lack of access to the Overheads page for the user without the Organization Access
OO_9	Check the Scheduled tab on the organization overheads category page
OO_10	Check the Not Settled tab on the organization overheads category page
OO_11	Check the Settled tab on the organization overheads category page
